

JLG

Security Services Limited

Quality & Reliability

- Established in 1986.
- Specialists in the design, installation and maintenance of intruder alarms, access control, fire, CCTV and integrated systems.
- Covert and overt security systems.
- Wide range of national, Blue Chip clients.
- Existing systems taken over, upgraded and maintained.
- Installer of confirmed security systems.
- Registered member of the NSI.
- ISO 9000 accredited.
- Technically trained and highly professional staff attending regular training courses on all the latest products.
- Rigorous security screening of all staff carried out to conform with British Standards and police procedures.
- Dedicated and motivated engineering staff.
- All installations utilise tried and proven quality products assuring you of the best equipment currently available in the marketplace.

"JLG take trouble to specify an alarm that's right for you, explaining all options in non-technical terms. They will then teach you how to use the recommended systems. Installations are carefully carried out to avoid unsightly wiring" ES Magazine, 'The best Alarm bells'

Fast Train Courtesy of AMEC Rail

- Central monitoring stations receive the signals from your intruder system including open / close intruder, fire, confirmed and panic attack.
- The latest JLG CCTV Digital systems connected to Central Station give the exact location of the intruder within the site.
- Digital communicator, RedCare GSM systems installed.
- Skilled operators on standby 24 hours a day ready to react to any problem.
- Modem diagnostics, uploading and downloading information are a standard function of our equipment.
- Existing CCTV systems upgraded to Digital recording with Internet access.
- IP addressable cameras installed.
- Automated gate systems installed.
- Free surveys and on-site advice, including training the user in operation of the systems.
